Pavel Belov received the BSc and MSc degrees in applied mathematics & computer science, and the PhD degree in optics ('98,'00,'03), all from St. Petersburg State University of Information Technologies, Mechanics and Optics in Russia. He also received a Licentiate and Doctor of Science in Technology (2nd PhD) in radioengineering from Helsinki University of Technology in Finland. He has been employed at ITMO, Russia, HUT, Finland, and Samsung Electronics, Korea. Since 2005, Dr. Belov has been with the Queen Mary University of London (UK) and is currently the EPSRC Advanced Research Fellow (2007-2012).

Dr. Belov has published over 52 journal papers, 10 book chapters, and 60 conference reports. His research interests include metamaterials, plasmonic nanostructures, and photonic crystals with emphasis on analytical and numerical modeling.
